Version 2 Limited proudly presents the Point 2 View USB Document Camera from IPEVO.

Designed with an excellent 2.0-megapixel resolution and unmatched versatility, the P2V USB Camera will quickly become your favorite for video chats, business presentations, family photo sharing, and much more. Hold the camera like a pen, and literally point to view – or attach the P2V to any standard laptop screen or monitor for a more traditional chat perspective.

An immense success among educators and schools worldwide, the P2V USB Camera also doubles as a projector with its solid weighted base, allowing you to project live images for meetings and presentations with the Full Screen mode of included software.

Capture from any distance and angle, and that includes up close and personal. Macro mode allows you to get within 2 inches (5 cm) of your subject, and with autofocus, you can expect remarkable sharpness and detail every time. What's more, you can also take a snapshot with the one-touch button functions on the camera itself. Use one-button autofocus for maximum customization, or use continuous autofocus for maximum convenience.

The P2V USB Camera is fully compatible with most Instant Messaging applications, including Skype, Google Talk, Windows Live Messenger, Yahoo! Messenger, and AOL. Its plug-and-play capability makes it easy to install whether you're a Mac or a PC user via any standard USB port.

Highlights

- 2.0-megapixel CMOS sensor, with macro mode (up to 2", 5cm) for excellent closeup images.
- Plug-and-play for both PC and Mac; seamless integration with a wide variety of IM applications.
- Continuous or single-click autofocus for clarity and sharpness every time.
- Unique, multi-jointed stand, handheld grip, and universal monitor clip for unlimited view options.
- One-touch snapshot mode; snapshots can be refined and organized with included software.

What's in the Box
